PROJECTS

TaskFlow — Task Manager Application

[Live Demo](#) | [GitHub](#)

React · Node.js · Express · MongoDB · JWT · Tailwind CSS

- Engineered a full-stack task management app with JWT-based register/login authentication and protected routes
- Built complete CRUD operations with task priority levels (High/Medium/Low), real-time search, and completion tracking
- Deployed frontend on Vercel and backend on Render with MongoDB Atlas — fully live and accessible

The Bachelor's Life — Blog Platform

[Live Demo](#) | [GitHub](#)

React · Firebase · EmailJS · Tailwind CSS

- Developed a blog platform with admin-only authentication allowing full CRUD control over published posts
- Integrated Firebase Firestore for real-time database and Firebase Auth for secure admin login
- Built an email subscription system using EmailJS — subscribers automatically receive notifications on new posts
