Summary of Experience and Qualifications

Abhishek is a data engineer in designing and delivering enterprise-grade data platforms leveraging Azure Databricks, Azure Data Factory and SQL. He has expertise in building data warehouses and lakehouses that drive data-driven decision-making, with strong proficiency in data extraction, transformation, and aggregation.

Technical Skills

- Expertise in designing optimized target data models and scalable warehouse/lakehouse architectures aligned with industry best practices.
- Strong understanding of Apache Spark architecture, including Spark Core, DataFrames, Driver/Worker nodes, and cluster tuning for high-performance big data processing.
- Proficient in designing and implementing Azure Data Factory (ADF) pipelines and Data Flows to support complex ETL workflows.
- Experience using Azure Logic Apps for workflow automation and system integration.
- Hands-on experience integrating data from multiple sources including SQL Server and cloud storage platforms.

Tools Experienced & Managed:

Database: SQL Server

ETL: Azure Data Factory, Azure Databricks, Pyspark

Storage & Warehousing:: Azure Blob Storage, Azure Data Lake Storage (ADLS), Azure Data Warehouse

Languages: Python, HTML, CSS, JavaScript

Other Tools: Canva

Academic Projects

Azure Lakehouse Data Pipeline Project

Tools: Azure Data Factory, Azure Databricks, ADLS, SQL

- Designed an end-to-end ETL pipeline to ingest, transform, and store structured data in a lakehouse architecture.
- Built Spark transformations in Databricks for cleansing and aggregation.
- Implemented partitioning and optimization techniques to improve query performance.

Sales Data Warehouse Implementation

Tools: SQL Server, Azure Data Factory

- Designed star schema data model for sales analytics.
- Developed ETL pipelines to load data into fact and dimension tables.
- Created analytical queries to generate business insights.

Education

Bachelor's Degree

University Of Delhi

Year of Graduation: 2025

Strengths

- Strong analytical and problem-solving skills
- Quick learner with adaptability to new technologies
- Strong understanding of data engineering concepts
- Detail-oriented and performance-focused
